Customer Reviews

Our district will start to implement Skill Streaming the beginning of next year. We were given the training and several core books, but this book is a great add on for continuing lessons. I teach SPED Resource Room, so sometimes I end up having to create my own extra lesson plans. This book is well thought out and detailed. You can use part or some of the further ideas. It has great ideas, and supplemental handouts for the classroom and home to help students track their behaviors. It will help make students more accountable to see if they are using the skills and processes. I have started to pilot the program and I love having this extra book to free up my time to be used for teaching rather than developing more lessons. This will also serve in the general

education classroom if students just need more to help them help master the skills. I highly recommend it!

I use this program after reviewing several. I find it relates to the children well and they are learning with it. I would recommend this to any one the only thing I would suggest would be to put a copy out in looseleaf. As the forms are made to copy. I did end up purchasing the CD with the forms but it would have been nice to have some in looseleaf format.

I like the simplistic skill break down of the lessons and the situation practices. I was hoping for more exciting visuals and activities that would capture the interest of elementary school students, but overall it is a useful book that I utilize daily with my individual students and groups.

The book was required for a class and I found that it was not only useful in the class but was applicable in my own classroom
