# Schools Where Everyone Belongs: Practical Strategies For Reducing Bullying

## **Synopsis**

This new edition is packed with practical guidelines and proven strategies for implementing a whole-school approach for reducing bullying. The author draws on theory and research, as well as over two decades of experience as a school counselor and consultant to provide educators with his creative ideas and successful techniques. Interventions to help aggressive youth internalize rules and develop conscience are paired with methods for helping targets of bullying. Chapters cover a wide range of topics, including myths about bullying, acknowledging positive behavior, effective discipline, working with parents, relational aggression, empowering bystanders, and preventing disability harassment.

## **Customer Reviews**

Written by family and child therapist and school counselor Stan Davis, *Where Everyone Belongs: Practical Strategies for Reducing Bullying* is a highly practical guide written especially for schoolteachers and other educational professionals, yet invaluable for anyone who oversees groups of children. Now in an updated second edition, *Schools Where Everyone Belongs* demystifies what bullying is and common myths about its effects, what doesn't work to combat it, and most importantly of all, classroom-tested methods that do work to stop bullying and reverse its harmful effects. "When there are inconsistent consequences for bullying, young people are likely to continue. When we have to customize a consequence for each incident, the process of discipline becomes impossibly time-consuming. Planned, rubric-based consequences take much less time to administer and thus can be used more consistently. When consequences are predictable and based

on a clear rubric, young people can learn from each other's misdeeds." An absolute "must-have" for grade school teachers and principals everywhere.

Stan Davis has taken Dan Olweus' research and created practical applications that have dramatically changed school environments across the country. Order this book today! And also check out his website, [...]

I have been working with children for a long time and this book really opened my eyes. I need good reason to change my way of thinking and Stan Davis has given me that. In addition to making some very good points, he has seen this method be successful at numerous schools. I would recommend the book to anyone that works with groups of children.

Stan Davis' book, Schools Where Everyone Belongs is an informative guide for teachers, administrators and parents. Mr. Davis clearly outlines the practical strategies to create a safe environment for students documented with solid reseached based data. This is a must read for ALL schools, (and Parents). Deb Landry, children's author

This book changed my thinking in how I should attend to students having difficulties in my school. Lately I've felt frustrated with the media for making the word "bullying" such a big part of stories, spurring parents to complain about it more than before without incidences increasing in our school. His comparison of changing the way we perceive bullying (as how the public now looks at spouse abuse, civil rights, sexual harassment) made me truly think about bullying in a new light. It is something that should be lessened and changed so more students can better childhoods and feel better about themselves as they grow (perhaps the media is actually doing some good in making us all attend to this better). It was a quick read and a powerful one. It's summer and I can't start using his strategies with my students just yet. However, I have two sons, and have started using some of his language within their disagreements - with success! I wish the author was the counselor at our school - what a treasure he must be for his staff and students!

This book is what's been missing for eductors in the field of bullying prevention. It is a practical, well thought out and clearly explained, research based, guide to implementing bullying prevention and intervention in any school. Every teacher and administrator should read this book!

This book had some excellent strategies for creating a safe, classroom environment. It also gives students a voice to stop bullying on their own.
